

Create Users And groups in Active directory:

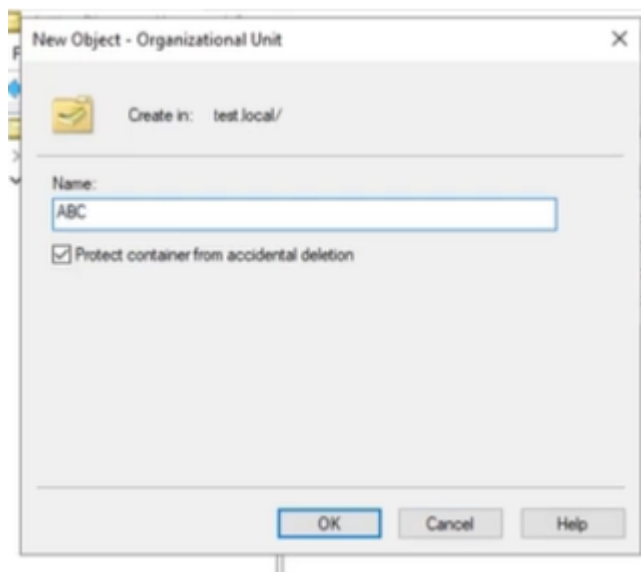

- Go to active directory server
- Go to server manager
- Select tools and select active directory users and computers

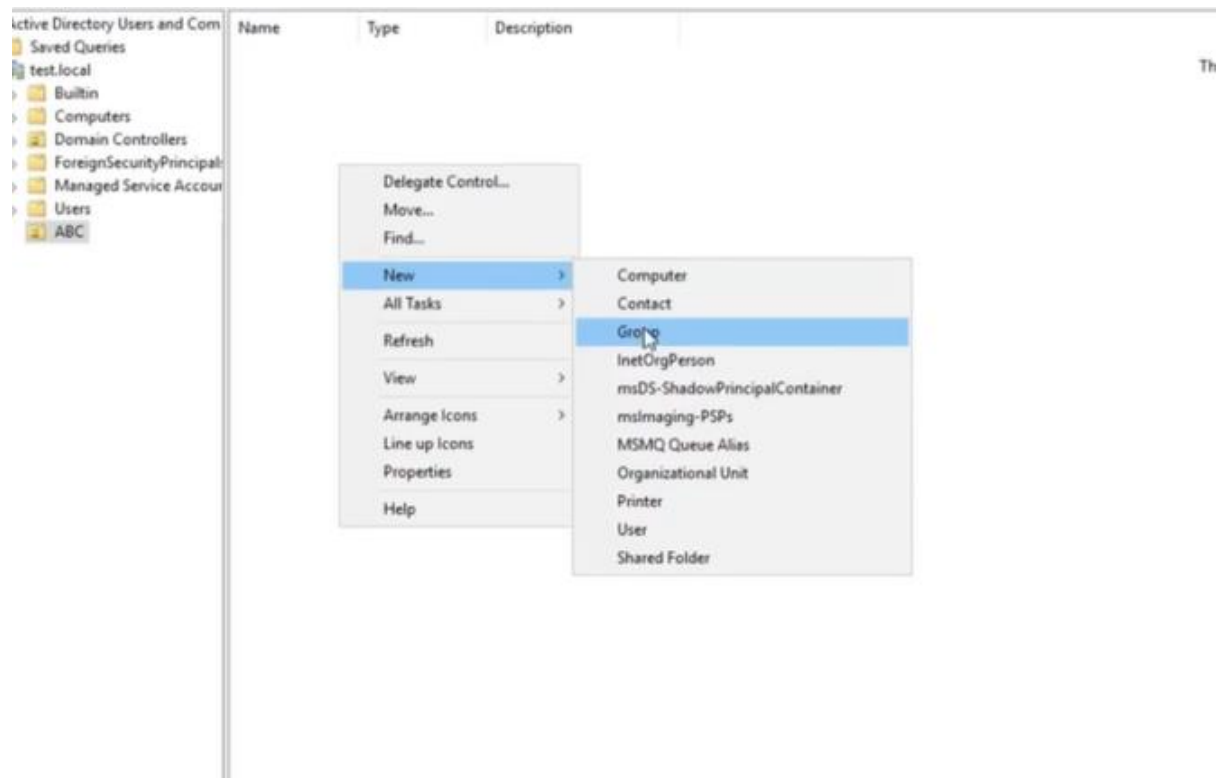

- Their go to test.local
- Right click and select new
- Select organizational unit
-

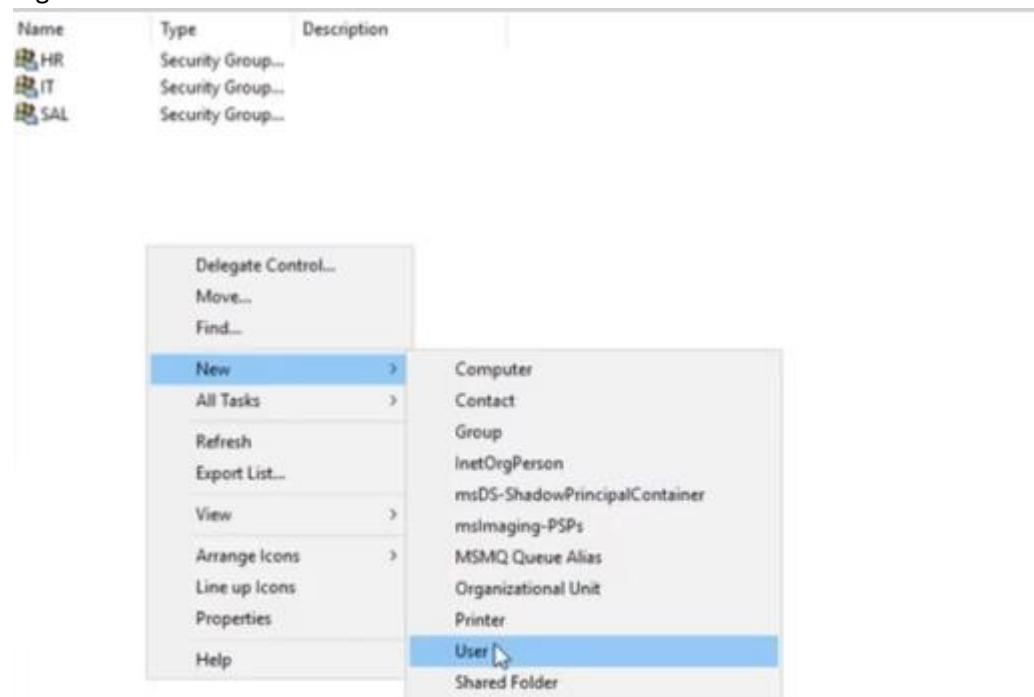

- Give name to new organization

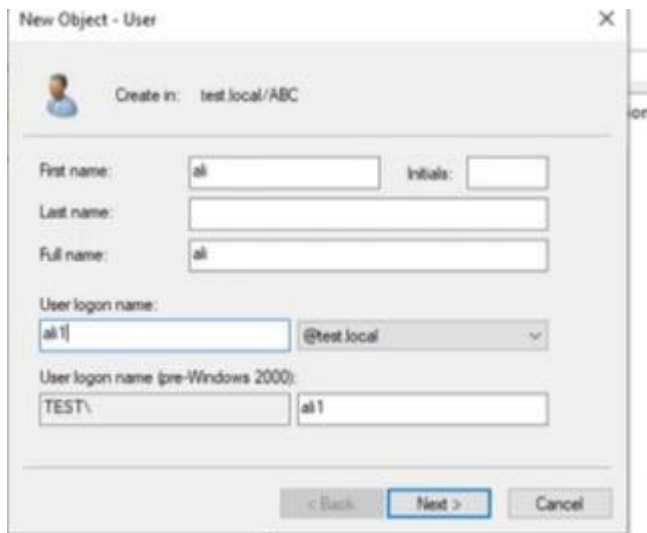

- Then right click after selecting ABC
- Select new and then group
- Add 3 groups or more like IT, SAL, and HR.

- Then create 3 users or more, and add in groups.
- Right click and then select user.

- Like

New Object - User

Create in: test.local/ABC

First name: Initials:

Last name:

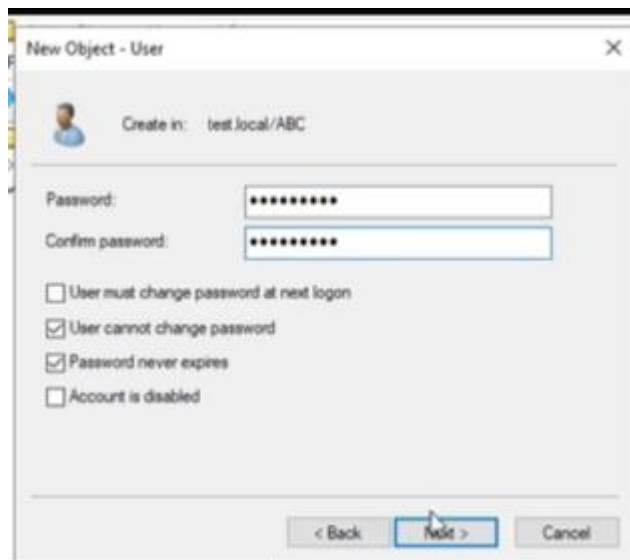

Full name:

User logon name:

User logon name (pre-Windows 2000):

< Back Next > Cancel

- Set password
- Abc@123

New Object - User

Create in: test.local/ABC

Password:

Confirm password:

☐ User must change password at next logon

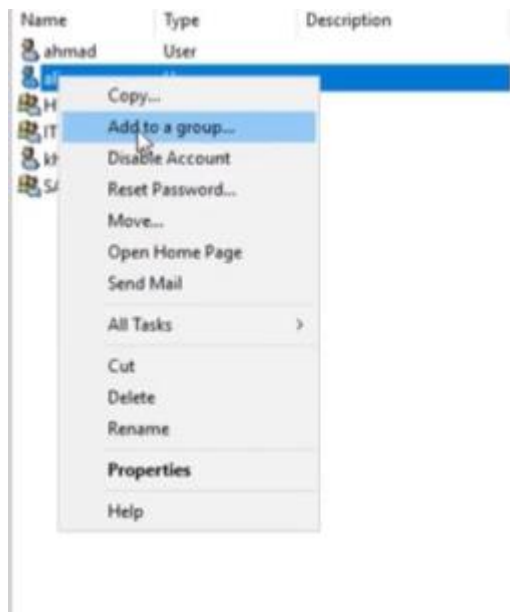

☒ User cannot change password

☒ Password never expires

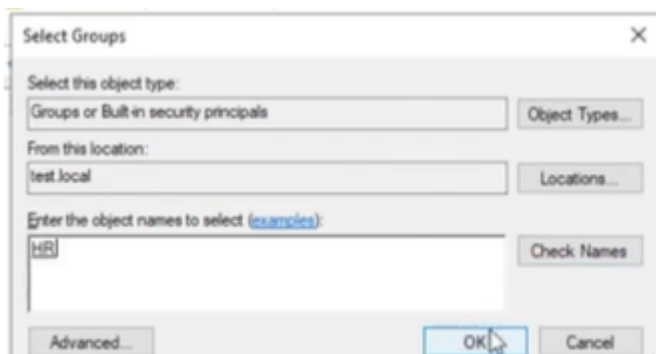

☐ Account is disabled

< Back Next > Cancel

- After creating atleast 3 users add them to groups
- Right click on user and select add to group

- Give group name and ok

- In this way you will add users to groups.

In this way you will add new users and groups in server according to your use and requirement.
